Silk Painting

A. Pébéo Setasilk Water Based Gutta

The water based guttas have a thick consistency and are used to create outlines - the Serti technique. The colours are pearlescent. The guttas are used directly from the tube and nozzle or from a pipette and gutta nib. They flow readily into the silk fibres forming a barrier to the colour. Setasilk is applied afterwards. All the guttas can be washed after having been iron fixed with the exception of the colourless gutta which is designed to wash out leaving a white line on the fabric where it has been applied.

25503121---	20ml Tube
2550312115	250ml Colourless (Water Based)

Pébéo Setasilk Solvent Based Gutta

Solvent based guttas are used for the Serti techniques. The guttas are thick and once dry, create a barrier to the Soie colours which are applied afterwards. They can be applied with a pipette and gutta nib or by brush. They do not need to be fixed, 30 minutes air drying is sufficient.

Fabric Painting

Pébéo Setacolor

Setacolor is a range of 70 concentrated heat fixed colours for decorating both light and dark fabrics. The rich texture suits application with brush, stamps and stencils as well as screenprinting. The 15 Opaque Shimmer Colours, which change with the movement of light are particularly spectacular! After fixing with a iron, fabrics are perfectly resistant to washing and dry cleaning. Non-toxic and brushes clean in water.
