

# Fragonard

ARTIST'S OIL COLOUR

discover the  
warm  
COLOURS  
of Spring

**Fragonard Yellow Earth and Fragonard Red Brown** have been created using a new generation of mono pigments bringing a freshness of tint with strong light resistance. The **Fragonard Yellow Earth** is a chrome titanium yellow, a lighter more luminous version of Yellow Ochre; the opaque pigment used gives a very high level of resistance to chemical aggression and UV light.

**Fragonard Red Brown** is a transparent pigment which gives powerful colour and an excellent resistance to UV light).

**Oriental Yellow** and the **Medium Oriental Red** are particularly warm transparent tints which will bring brilliance and luminosity to your works. These tints guarantee an optimal level of conversation to artistic works.
