

# ViewCatcher™

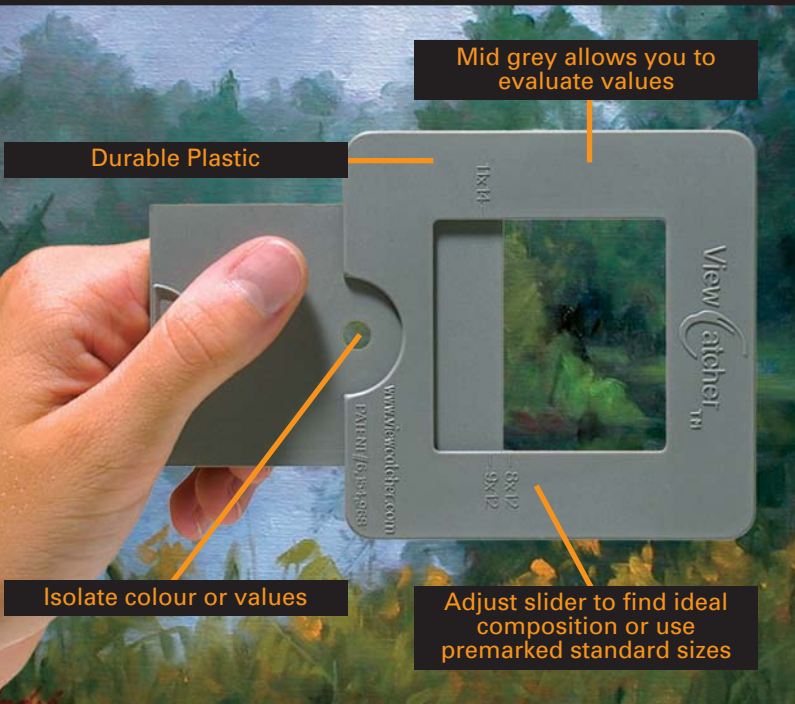

*The Artist Tool That Teaches*

The ViewCatcher™ is an artist's view finder created to be a composition or cropping tool for artists or photographers.

This viewfinder can be used for still life drawing or painting, plein air painting, figures, and landscapes.

View catchers can be used to establish horizontal or vertical orientation and locating the horizon.

The ViewCatcher™ lets you view your subject matter and your artwork so you can make better decisions about composition, value judgment and true colour.
